SUMMARY

I am a detail-oriented Back-end focused Full Stack Python Developer, driven by real-world problem-solving and a passion for clean architecture. I bring hands-on experience through building and deploying user-centric applications, combining technical expertise with a creative mindset. Eager to contribute to a dynamic team where innovation, ownership, and performance matter.

SKILL

Programming Language : Python, JavaScripts, Typescripts, C

Frameworks : Django, FastAPI, DRF, Flask, Next.js

Database: PostgreSQL, MongoDB, SQLite.

Tools : Git, GitHub, VS Code, Pycharm, Figma, Cursor, Google AI Studio, Render, Vercel, MS Power Automate.

AI Development : AI Integration, Langchain, LLM.

Additional Skills : Wordpress, Digital Marketing , SEO.

WORK EXPERIENCE

Full Stack Developer Intern

July 2025 - Oct 2025

Maxwell Stamp Ltd (4-month Internship)

- Worked on multiple AI-integrated full-stack web projects using Django, Django REST Framework, and Next.js. Gained hands-on experience in backend API development, AI API integration, and responsive frontend design.

- **Projects :**

- **AI-Powered Resume Parser:**

- Developed a full-stack solution using Django, DRF, Next.js and Gemini 2.5-pro(paid) that automatically detects, parses, and organizes CVs dropped into the server. Implemented a modern, responsive UI with multi-search and real-time CV display, streamlining CV management and workflow.

[Live](#)

Full Stack Developer

Feb 2025 - Present

Rizqara Tech (Project Base)

Worked on full-stack projects including RizQ Food and the Rizqara Tech portfolio website, developing robust backend APIs with Django and DRF, integrating frontend features using Next.js and React.js, and handling data processing with Pandas and NumPy. Currently contributing as a backend developer on the RizQ Hunt project, improving system functionality, performance, and scalability.

PROJECTS

Farm2Fork(A multivendor E-commerce site)

[Full code](#)

[Live](#)

- Developed a full-featured e-commerce backend using Django & Django REST Framework (DRF), enabling secure user authentication and product/order management.
- Designed RESTful APIs for products, cart, orders, and user management with JWT-based authentication.
- Built a responsive frontend with Django template, and html, css, js, Tailwind CSS, connecting it with the backend APIs.
- Deployed the application on Render, ensuring live access and smooth user experience

EDUCATION

Bachelor of Computer Science And Engineering

2022 - Present

Canadian University Of Bangladesh

Diploma in Computer Technology

2017 - 2021

Barishal Polytechnic Institute
